To Whom It May Concern:

Last month Providence Montessori Teacher Education Center hosted the workshop *Building Bridges Across the Curriculum Using Song, Movement, Music Games, Drama, Dance and Sensory Integration* by Kathy Poelker. This workshop was a tremendous professional development experience for our Providence staff as well as Montessorians throughout the Bluegrass.

Kathy Poelker's presentation included both theory and activities integrating sensory issues with movement. She shared valuable brain research information as well as handouts with songs and activities so that the teacher's could return to class on Monday with some music and energy.

I recommend Kathy Poelker's program to all schools. Her depth of knowledge, enthusiasm and expertise in music were reflected in the dynamic day she spent at Providence. Kathy has presented all over the world and our teachers had high praise for Ms. Poelker's workshop. We look forward to a follow up session.

Please feel free to call me for additional information regarding our experience with Kathy Poelker.

Sincerely,

Kathy Regan
Director
